Dollar house program is a decentralized **network** program which operates on Binance smart chain network

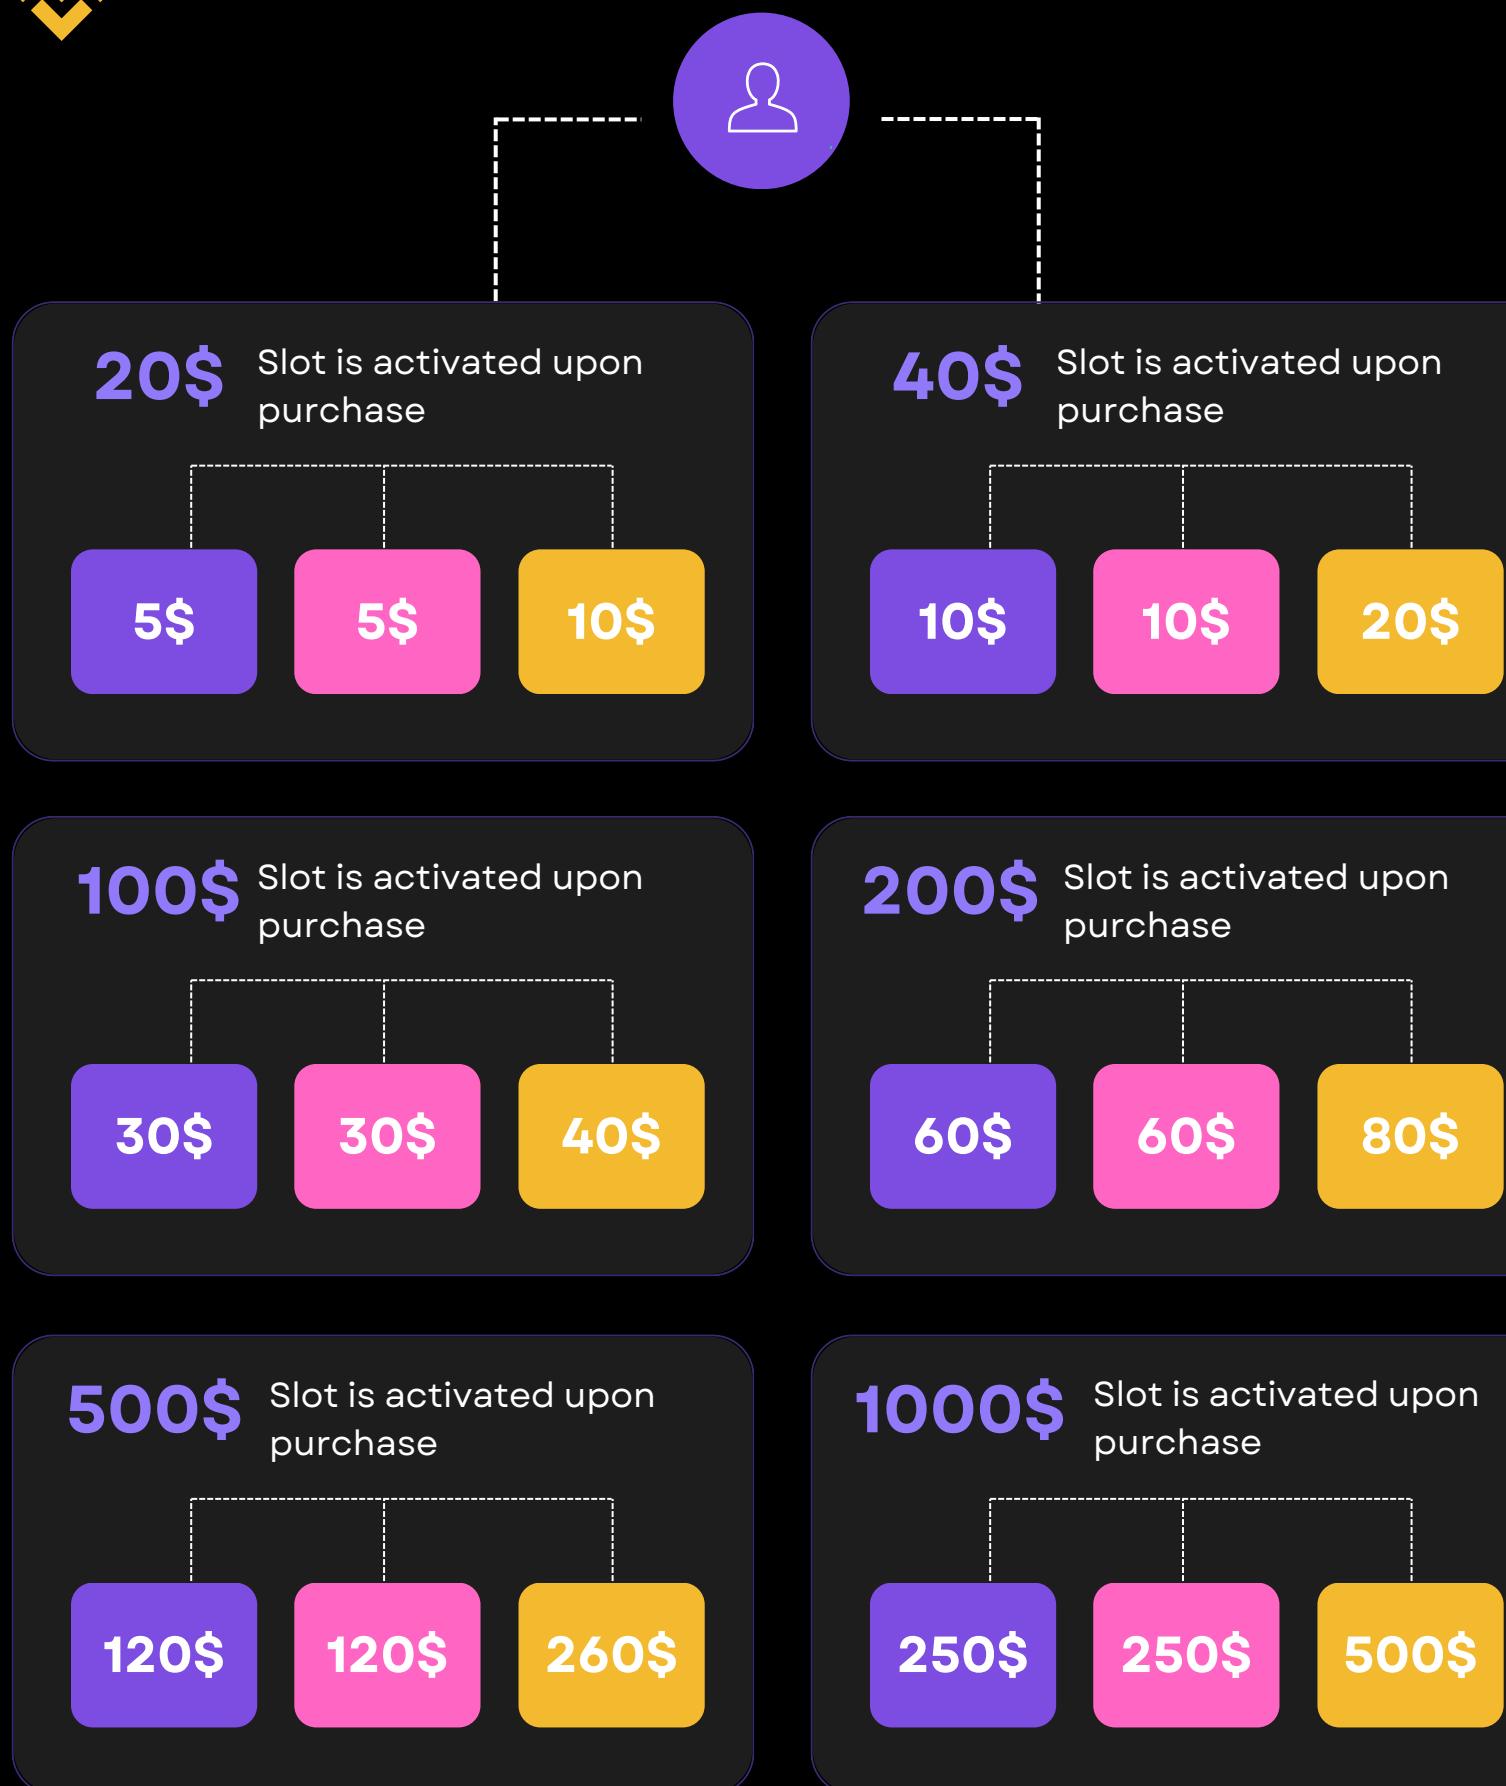

This program purely works on **smart contract** and there is no control of Admin over the assets & invested amount of the user

Dollar house uses **USDT** as its main cryptocurrency for all the user purchases. BNB is required to pay the gas fees.

The reason why Dollar house uses **stablecoin** as its prime currency because users don't have to worry about any **price fluctuation** and the price of currency will be stable.

## Features of Dollar House **Direct** Program

House 4 plan

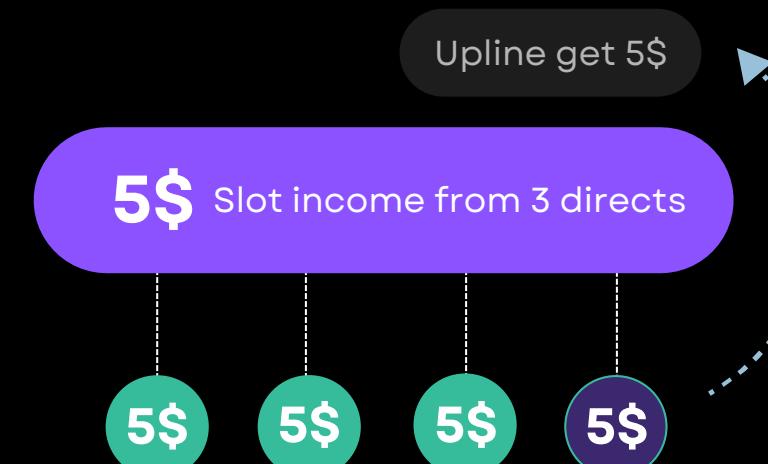

House 62 plan

House 15 level plan

Users will have to start with initial slot of **20\$**. Once the **20\$** slot is purchased they will become eligible to receive income of **3** slots. This process will be same for all the slots.

Upon **20\$** purchase, your **ID** will be activated. 1st box in every rectangle indicates the amount of USDT you will receive from every direct until your **3** directs are completed.

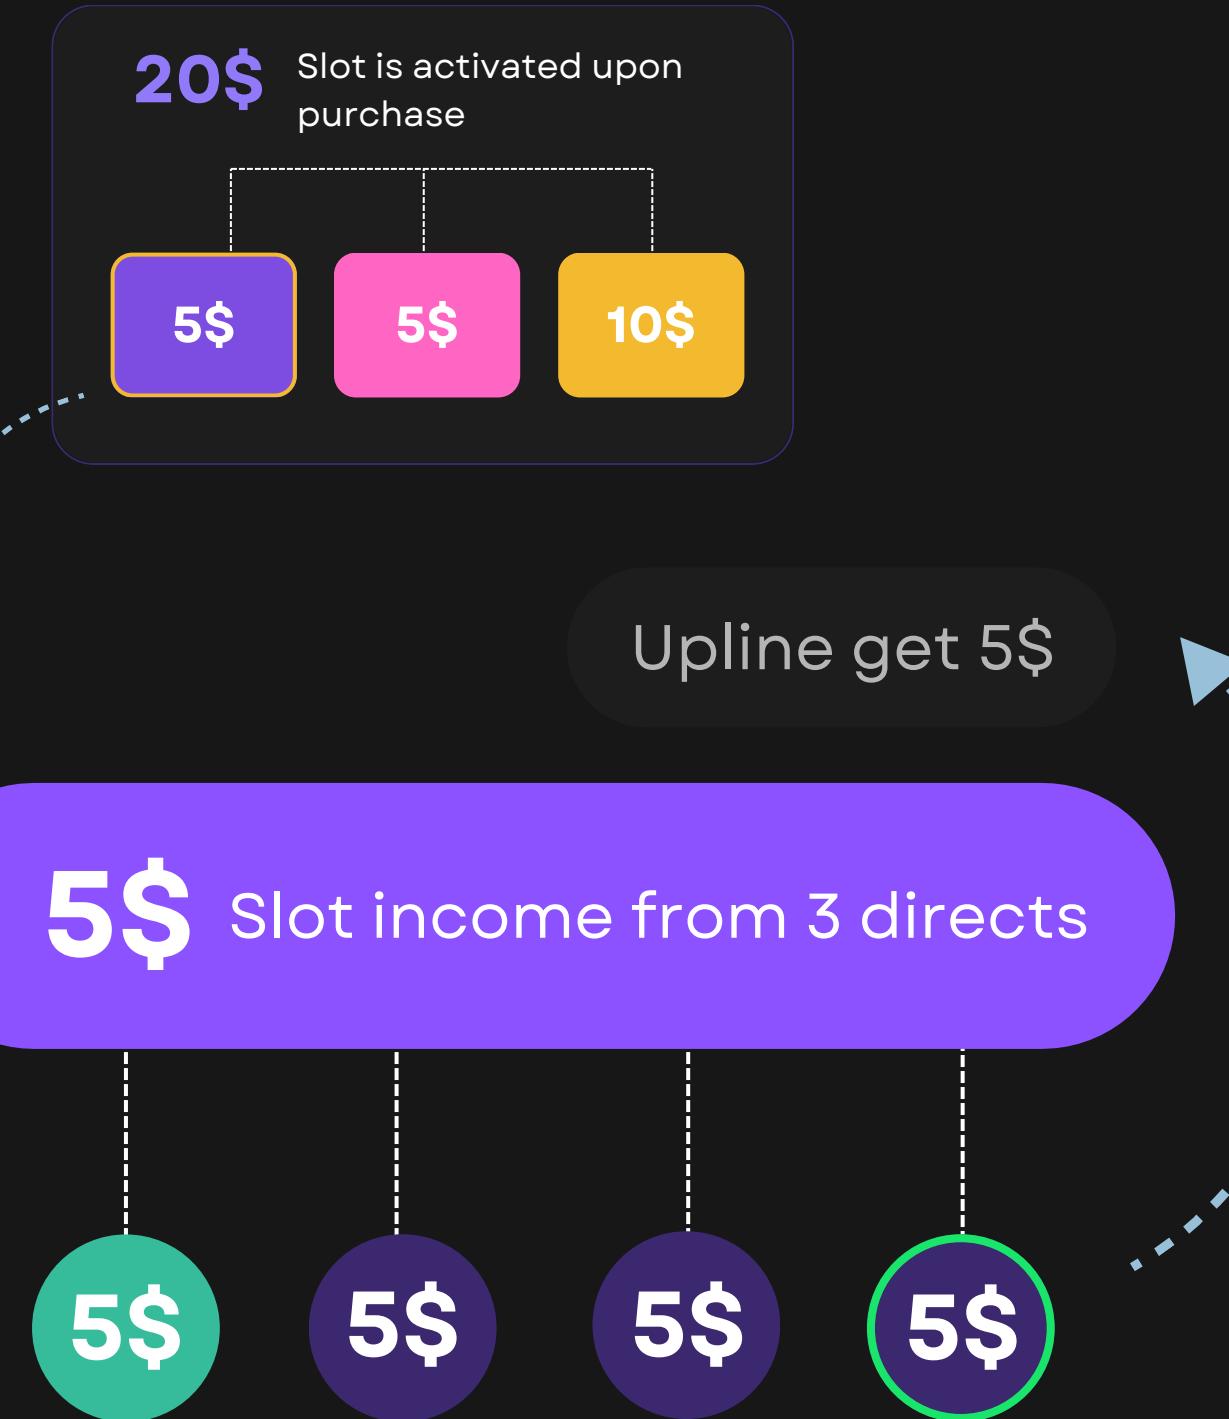

Once you receive **5\$** reward from your **3** directs, **4th** direct reward will be sent to your **upline** which is represented below

Do not forget you will still get remaining **5\$ matrix** reward & **10\$ Level** rewards from direct

If you do not have any upline, then the rewards will be sent to the Dollar house smart contract. You can now buy **40\$** plan to activate **3** new slots.

## How House 4 plan works

### House 4 plan

User will have an earning of 15\$ from this specific slot. As shown in figure if direct purchases 20\$ plan, parent will receive 5\$ on every transaction, until 3 circles are filled.

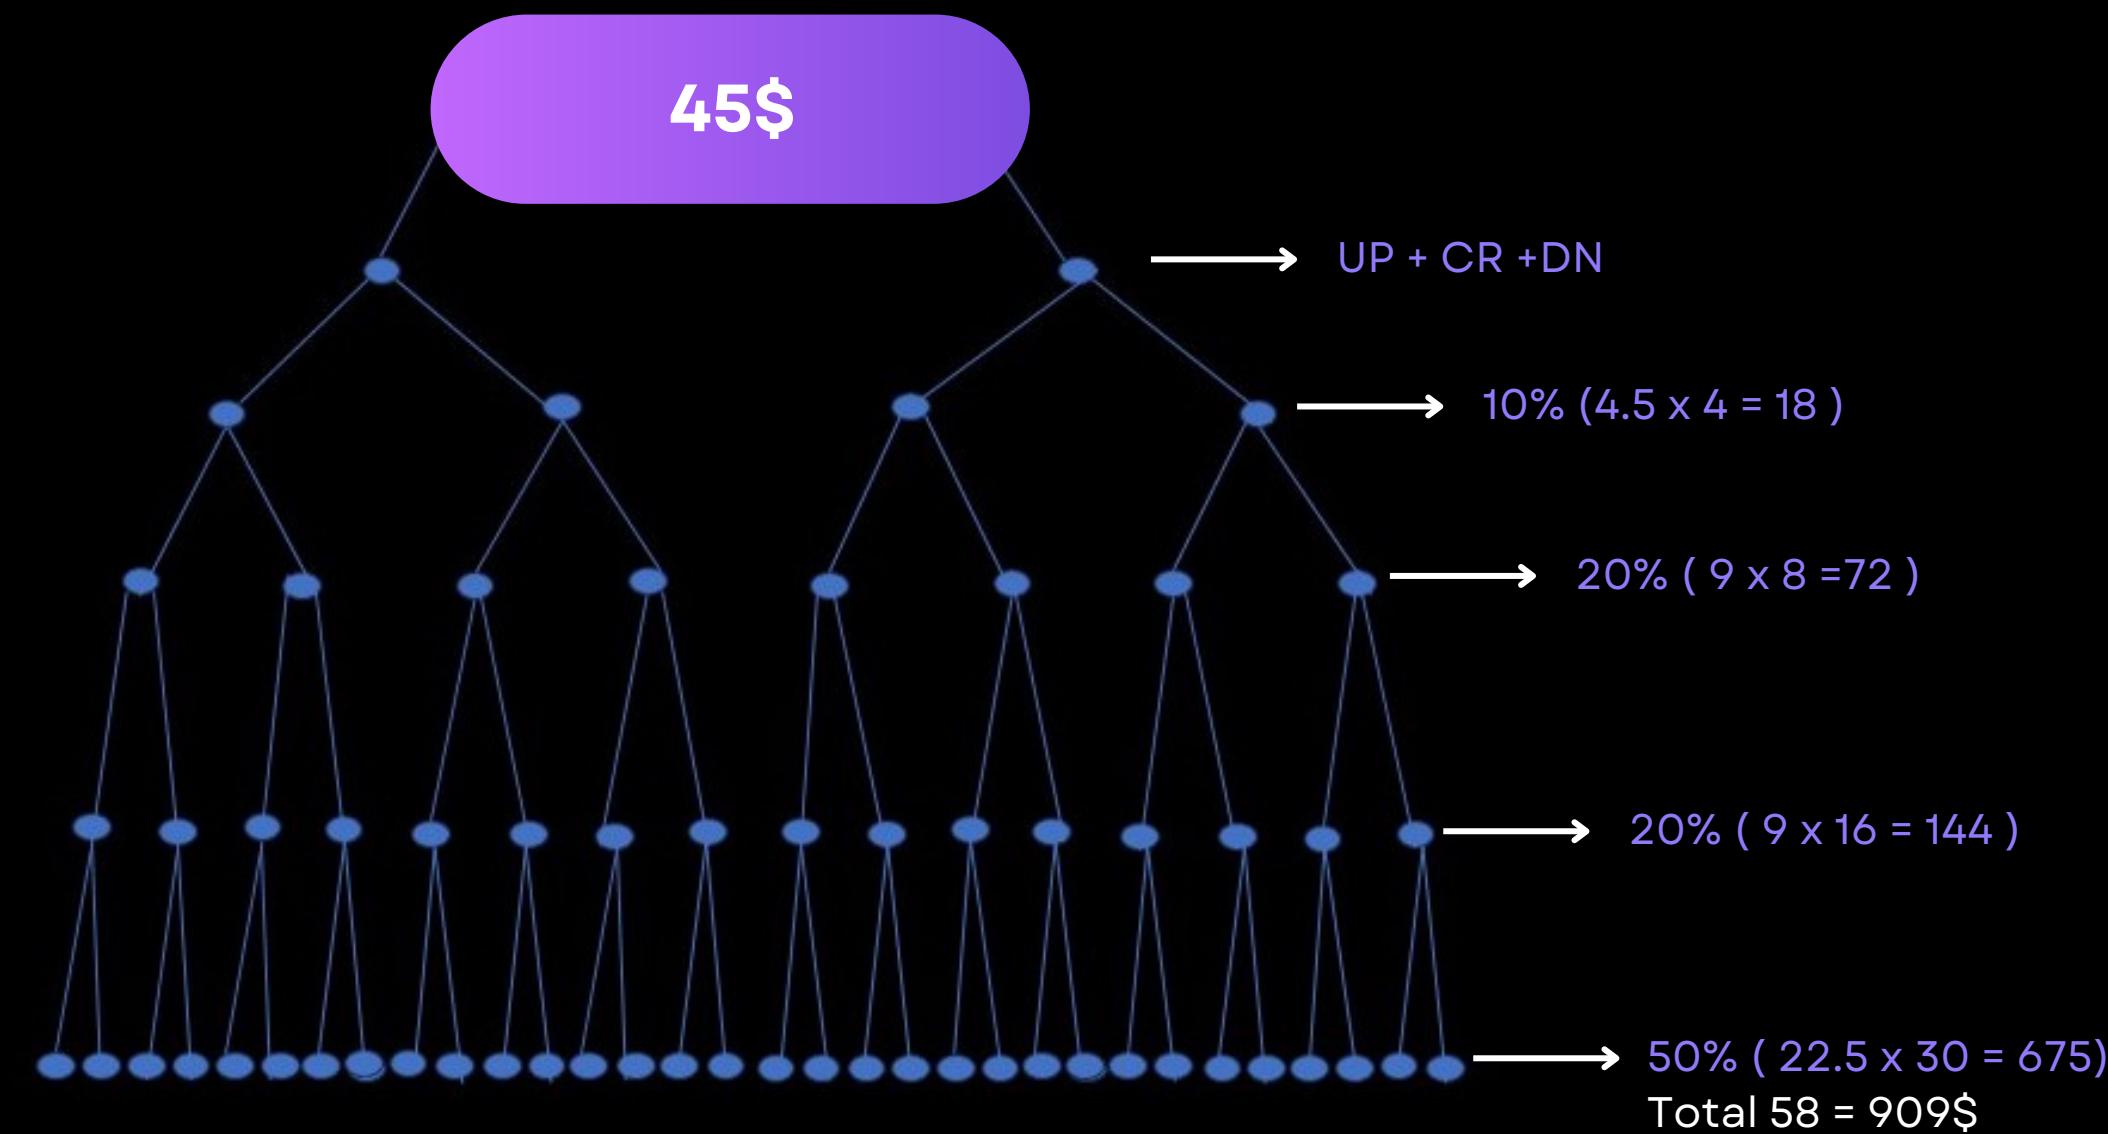

In the given graphical representation, user has received 5\$ from his child and one circle is filled. Parent still have 2 more circles to fill and rewards of those 2 circles will be credited to parent wallet address directly.

- Why the 4th circle is highlighted?

Whenever your 4th direct purchases a 20\$ plan, 5\$ income from that purchase will be credited to your upline as shown in the figure.

**Note :** If you have unlocked 20\$ slot, you will be eligible to receive income of your childs from 20\$ slot purchase only. To receive rewards of 40\$ slot from your childs, you & your child needs to unlock that specific slot.

## Features of Dollar House **62 matrix** Program

1

Once you purchase 20\$ slot, your **62 matrix** slot will get activated. Your parent will receive 1\$ & leftover rewards will be sent to upline parents

2

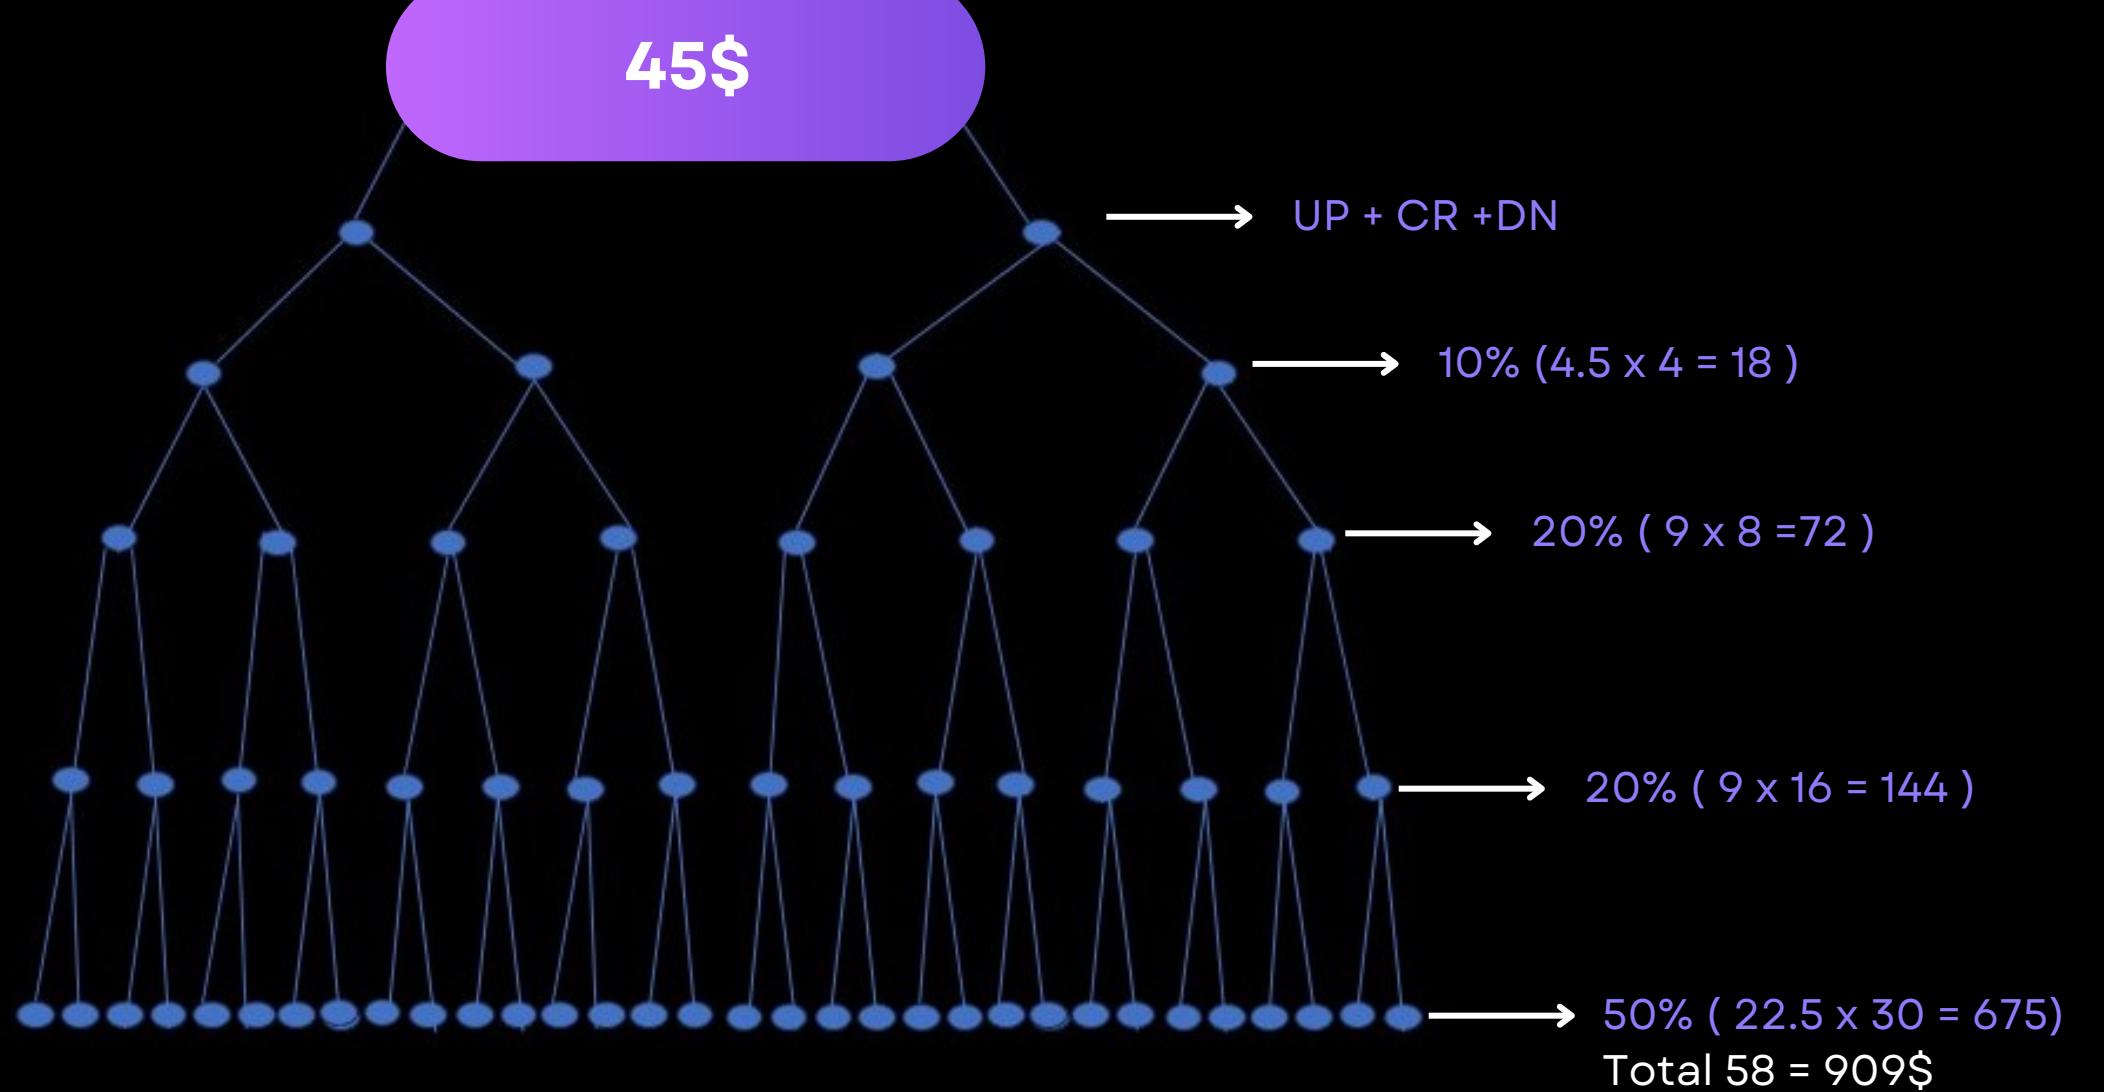

If user has purchased 20\$ slot, his upline will get 20% of 5\$. As there is 5\$ reward in matrix plan for 20\$ purchase. Thus upline will get 1\$ each

3

On Line 5, this matrix slot will be recycled, once 62 circles are filled by the user. Here all the 15 Levels of parent user will be unlocked.

## How House 62 plan works?

1 REC.=909\$ (62)

5 REC.=4545\$ (325)

10 REC.=9090\$ (620)

25 REC.=22725\$ (1550)

50 REC.=45450\$ (3100)

100 REC.=90900\$ (6200)

Let's suppose user has purchased 20\$ slot and unlocked **House 62 plan**.

Whenever his child purchase 20\$ slot, parent will receive 20% of what his child is buying & distributed to House 62 plan

User A purchased 20\$ slot. He became eligible for House 62 plan, which gives him **20% rewards of 5\$** in that slot on each line, which is 1\$ on every direct.

If there are downline members below user A, they will get 20% each. If there is no member present to receive the reward, then the leftover amount is sent to admin wallet.

Note : You need to purchase next slot once your **House 62 plan** is recycled and filled with 62 circles.
